Brooklyn, NY ▪ DEC 2016 – MAY 2017 
+ Python scripts to crawl and ingest data from various platforms
+ Cron setup for regular crawls to ingest day to day information

APPLICATION/PRODUCT DEVELOPER – KAYBUS INC

Bengaluru, INDIA ▪ JUNE 2014 – JULY 2016 
+ Backend / Client side web development along with data ingesting services that fetch relevant content from Confluence, JIRA etc
+ Performance boosters for various huge data fetching components
+ Kaybus app recommendations inside Salesforce application

SELENIUM AUTOMATION INTERN – SABRE Corporation

Bengaluru, INDIA ▪ JULY 2013 – DEC 2013
+ Fully automated test suite using Selenium for some backend services
+ Minor tweaks to a multi environment data replication Java service

WEB DEVELOPER INTERN – NAVYUG Infosolutions

Noida, INDIA ▪ MAY 2013 – JULY 2013 
+ Online portal for users to access surveillance feed from their DVRs
+ Authentication using Devise, TDD with RSpec etc.

PROJECTS

What's New

Distributed system to present relevant info from various sources

Search Phrase Highlighter

Chrome extension to highlight multiple keywords in a webpage

Jsonified HTML

Render HTML elements / React components via JSON input

Algorithms

Ruby / Javascript implementation of various algorithms from CLRS

React Graph

Graph visualization with customizable node points that support any element

Solarsystem

9planet, 3moon, 1sun hierarchical system with skybox and various post-processing effects
